# USING PEUGEOT PLANET SYSTEM

## 1 Preamble

The aim of this user guide is to enable the user to become acquainted with Peugeot Planet System.

You will find out how to get to your tools and favorite services :

- Peugeot Planet Diag,
- Peugeot Planet 2000,
- The wiring diagrams,
- Infotec,
- Peugeot and diagnosis related Web sites .

The following points are also described :

- The access to new tools (Peugeot Planet Measure, your measure card and Scantool<sup>1</sup>, your official tool)
- The steps to follow in order to configure your tools, to perform your updates, etc... as well as advice that will help you to make better use of your PC.

---

<sup>1</sup> Available in the next updates.

# USING PEUGEOT PLANET SYSTEM

## 2 Using your PC

Peugeot Planet System tools are installed in your PC. This paragraph describes the different steps to follow as well as the basic uses you can make of it.

### 2.1 Turning the PC on

**NOTE :** It is recommended to turn your PC on while the PPI is unplugged (neither connected to the PC nor to the vehicle). The PPI should be connected to the PC only after the PC has started (with the welcome page displayed on the screen).

<p>Press the power button located above the keypad to turn the laptop computer On.</p> <p><b>NOTE :</b> Press the button a few seconds until the PC starts. If it does not start, the battery may be low. In such a case, plug the PC to the outlet using the charger / adapter.</p>	
<p>When the Windows XP welcome page appears, double-click on the "<b>Peugeot</b>" icon. Then wait until the PC starts a session.</p>	
<p>Wait until the Peugeot Planet Office welcome page is displayed. Then you can use the Peugeot Planet System tools.</p>	

# USING PEUGEOT PLANET SYSTEM

## 2.2 Turning the PC off

Perform the following steps to turn your PC off.

### Recommended steps :

Close all the applications	
Click on " <b>Start</b> " from the taskbar located at the bottom of the screen.	
Cliquer on " <b>Turn Off Computer</b> ".	
Confirm by clicking on " <b>Turn Off</b> ".	

If necessary, you can proceed to an emergency stop. Warning: it is not recommended to turn off your computer this way.

### Emergency procedure:

Press the On/Off switch during a few seconds, until the PC turns Off.	
---	--

**NOTE:** Do not turn off the computer while communicating with the vehicle for a download or a configuration update. It is recommended to close all the applications before turning the computer off.

## 2.3 How to optimize the battery life?

The maximum battery life duration is between 2h30 and 3h00. If the battery is not used correctly (computer permanently plugged in, for instance), the battery life may be reduced significantly.

# USING PEUGEOT PLANET SYSTEM

So when using the laptop computer in normal conditions, it is recommended to make **complete charge cycles**.

As far as possible, use the computer a 100% of battery capacity before charging it again.

**NB** : When the computer is not plugged in, a warning message appears as soon as the battery is too low. There is just a few minute charge left.  
Plug the computer in immediately.

To help you checking the battery state of charge, the computer displays a battery level indicator:

The battery level indicator informs you about the battery state of charge. On the right of this indicator is an icon that shows the power source : battery (1) or sector (2).

**NB** : Always keep the charger / adapter close to you, especially when travelling.

## 2.4 Automatic update of Windows XP

Your computer includes Windows Update, a specific tool by Windows that helps you to keep your computer up-to-date. Use Windows Update to run automatic updates.

This software downloads automatically the latest updates available from the web, when your computer is connected to Internet. When updates are ready for installation, a dialog box is displayed on the screen and an icon appears in the tool bar of the Windows desktop.

Just click on the icon to download updates in a few easy steps. Follow the instructions on the screen.

Example of a dialog box reporting that all the updates have been downloaded and are ready to be installed.

# USING PEUGEOT PLANET SYSTEM

Once the updates are installed, you may be requested to restart your computer.

## 2.5 Antivirus protection

The computer is protected against external attacks by the Symantec Client Firewall software. This software may display warning messages when you are connected to a site whose content is not secure, or when a virus has been detected in a file or in your computer.

In this case, follow the instructions displayed.

**NOTE :** It is recommended to proceed to regular updates of the Antivirus software in order to ensure a complete protection against viruses.

The software updates itself automatically and regularly. If your computer is switched off while a scheduled update was due to start, you can update your computer manually. To do so, just read the following steps:

In the notification area of the taskbar, double-click on the Antivirus software icon.

The Norton Antivirus welcome page is displayed.

Click on "**LiveUpdate**" in order to start a manual update.

# USING PEUGEOT PLANET SYSTEM

Click "**Next**" to start the download.

Once the update is performed, click on "**Finish**".

Then, click "**Exit**" from the Norton welcome page.

You can also configure the software update parameters by yourself. To do so, please read the following steps:

In the taskbar, double-click on the Antivirus software icon.

Symantec Antivirus starts. We will proceed to the configuration of the update frequency.

To do so, click on "**File**" and on "**Schedule Updates**".

# USING PEUGEOT PLANET SYSTEM

<p>Click on <b>"Schedule"</b> to define the update frequency".</p> <p>By default, updates are scheduled every Monday at 11:00pm.</p>	
<p>If you want to change these parameters:</p> <p>Choose an appropriate frequency update in <b>"Frequency"</b> (daily, weekly or monthly).</p> <p>In <b>"When"</b>, choose the day and hour when you want the updated to be made (ex: every Friday at 8:00pm).</p> <p>Then click <b>"OK"</b></p>	
<p>Make sure that all the changes have been taken into account.</p> <p>Click <b>"OK"</b>.</p>	
<p>Then click <b>"Exit"</b> from the Norton welcome page.</p>	

**Note : You may be requested to deactivate the Antivirus. To do so, read the following steps (only if requested by the technical helpdesk or by the installer):**

<p>Right-click on the antivirus icon.</p>	
<p>In the menu that is displayed on the screen, click "Enable File System Realtime Protection".</p> <p>If the antivirus is activated, this sentence is preceded by "✓"</p>	
<p>The icon changes to inform you that the antivirus is activated. If you click again on the right button of the mouse, the sign "✓" will disappear.</p>	

# USING PEUGEOT PLANET SYSTEM

## 2.6 Laptop computer standby

**Note:** By default, the standby of your PC as well as the standby of the screen have been deactivated at the installation.

**Observation:** Do not mistake the standby of the PC for the standby of the screen, which only aims at saving the screen power.

**Screen save :** A screen saver is displayed on the screen if the PC is not used for a few minutes. This screen disappears when a key is pressed or when the mouse is moved.

**PC standby :** The screen turns off and the hard disk drives stop. To wake your PC up, you must press the On/Off switch:

If the PC enters in standby mode, it is because the standby mode has been activated. To deactivate it, proceed as follows:

<p>Right-click on the Windows desktop, and click on "<b>Properties</b>" in the drop-down menu.</p>	
<p>In the "<b>Display Properties</b>" window, click on "<b>Screen saver</b>", then on "<b>Monitor power</b>".</p>	

# USING PEUGEOT PLANET SYSTEM

Check that "System standby" and "System hibernates" parameters are configured at "Never".  
If it is not the case, switch to "Never" mode and click on "**Apply**", then close the window.

Otherwise, close the window.

## 2.7 How to connect Peugeot Planet interface?

Here are the steps to follow to use Peugeot Planet interface.

Connect Peugeot Planet Interface to the USB cable.

Connect the other extremity of the cable in one of the two USB ports of the laptop computer.

The two USB ports (number 1 et 4) are located on the left side and on the back of the laptop computer.

# USING PEUGEOT PLANET SYSTEM

Check that the green light turns permanently on in the back of the Peugeot Planet Interface communication card.

You can also check that your PC recognizes Peugeot Planet Interface by using the "Device Manager". To do so, please read the following steps.

Click on "**Start**" from the task bar at the bottom of the screen.

Click on "**Control panel**".

Select "**System**".

# USING PEUGEOT PLANET SYSTEM

In the window that appears, click on the "Hardware" tab, then on the "Device Manager" button.

A device list is displayed, in which you can find:

**ACTIA USB Device**

If you click on it, a new line appears:

**USB Com Board Driver (Multi-instance)**

# USING PEUGEOT PLANET SYSTEM

## 3 Using Peugeot Planet Office, the diagnosis manager

### 3.1 Understanding Peugeot Planet Office

Peugeot Planet Office is displayed on the screen once the PC is On (if working in DCS environment, start it from the Start menu). It is your entry point to all the Peugeot Planet System tools provided by Peugeot Cars. Among the various tasks available with this software are the following:

- Making diagnosis and repair sessions on a specific vehicle, by using the tools of Peugeot Planet Diag, Peugeot Planet 2000 and the Wiring Diagrams,
- Using the tools provided by Peugeot Planet Measure and ScanTool<sup>1</sup>
- Having access to other services linked to the diagnosis<sup>1</sup>, Internet, the assistance, ...
- Configuring the various applications of Peugeot Planet System.

Peugeot Planet Office saves the main information required by Peugeot Planet System, so you just have to type them once during a work session for a vehicle.

# USING PEUGEOT PLANET SYSTEM

## 3.2 Getting used to the Peugeot Planet Office interface

A screen in Peugeot Planet Office is composed of:

- A Peugeot Planet Office (1) identity strip
- A vertical context strip (2)
- A work area, which may include a help area (3)
- A toolbar (4) from which you can reach the different functions

The Peugeot Planet Office identity strip (1) confirms that you are working with Peugeot Planet Office.

The vertical context strip (2) is composed of three zones:

	<p><b>A navigation zone</b> that makes it easier to locate the page you are reading among other pages from Peugeot Planet Office. The majority of titles included in the navigation zone are clickable: just click on it to display its content.</p>
---	--

# USING PEUGEOT PLANET SYSTEM

	<p><b>A vehicle information zone</b> that displays the main vehicle information saved during the Peugeot Planet Office session.</p>
	<p><b>An indicator zone</b> including 2 icons:</p> <ul style="list-style-type: none"> <li>• <b>The update icon</b> that informs you about the update status of the Peugeot Planet System applications</li> <li>• <b>The Peugeot Planet Interface icon</b> that indicates whether Peugeot Planet Interface is being used by one of the Peugeot Planet System applications or not.</li> </ul>

**The main zone (3)** is the zone in which you work. An help zone may appear at the bottom of the screen to help you using Peugeot Planet Office better. All the useful information is displayed in this part of the screen.

The main successive screens of Peugeot Planet Office are the following:

# USING PEUGEOT PLANET SYSTEM

<p>Selection of the application</p>	
<p>Input of the vehicle information (ex: input of the VIN code)</p>	
<p>Input of the vehicle information (ex : input of the DAM number)</p>	

The toolbar (4) allows you to reach various functions that are described in the table below :

Name	Clickable buttons	Key
Back or Exit		F1
Internet links		F2

## USING PEUGEOT PLANET SYSTEM

Peugeot Planet Measure		F3
ScanTool <sup>1</sup>		F4
Software manager		F5
Peugeot Planet Office exit		F7
Vehicle information		F9
Get started		F10
Language		F11
Help		F12
OK		Entrée

### 3.3 Navigating in Peugeot Planet Office

To navigate in the Peugeot Planet Office screens, you can as well use the keypad as the mouse. The different ways to navigate are described below.

Navigation	Mouse	Keypad
To go to the previous screen:	Click <b>Back</b> 	Press <b>F1</b>
To go to the next screen:	Click <b>OK</b> 	Press <b>Enter</b>
To go back to the car selection screen	Click <b>Back</b> from the application selection screen	Press <b>F1</b>

<sup>1</sup> Available in the next updates.

## USING PEUGEOT PLANET SYSTEM

<p><b>NB : vehicle data previously saved by Peugeot Planet Office will be deleted.</b></p>	<div style="text-align: center;">  </div> <p>Click on "Vehicle selection" from any other screen</p> <div style="text-align: center;">  </div>	
<p>To go back to the data acquisition screen</p>	<div style="text-align: center;">  </div> <p>Click on "<b>Application selection</b>" from any other screen</p> <div style="text-align: center;">  </div>	<p style="text-align: center;">Press <b>F1</b></p>

### 3.4 Using the different windows

Every application that you launch opens in a new window. For each window, a button appears in the taskbar. When you click on a button, the matching window appears. If you click again, the window is minimized.

You can use these buttons to navigate between the different applications of Peugeot Planet System and Peugeot Planet Office.

### 3.5 Signing in

You may be requested to sign in when using the different tools or services available from Peugeot Planet System. Depending on the application or service that is used, you must fill in the following points:

# USING PEUGEOT PLANET SYSTEM

- Peugeot Planet Diag, the Wiring diagram, Infotec, other online ressources:
  - Your PSA login (ex: D123456)
  - Your PSA keyword
- For the assistance, the activation or deactivation of applications:
  - Your customer code or TACC code (from 6 to 10 letters and numbers, ex : FR0048)

## 3.6 Exiting Peugeot Planet Office

**Note: It is not recommended to exit Peugeot Planet Office!**

When you quit Peugeot Planet Office, the Windows Desktop is displayed. You will find on it the icons of the different applications. You can use the different applications by clicking on the matching icons, but you will miss the advantages provided by Peugeot Planet Office (especially the memorization of the vehicle data). To restart Peugeot Planet Office, click on the PPS icon if present on the Windows Desktop or use the Start menu.

Navigation	Clickable buttons	Key
To exit Peugeot Planet Office :	Click the <b>Exit</b> button 	Press <b>F1</b> (on first screen) or <b>F7</b>
You receive a confirmation screen.  <b>Warning: validating this message will delete all the vehicle data previously saved by Peugeot Planet Office.</b>		
To validate:	Click <b>OK</b> 	Press <b>Enter</b>

## USING PEUGEOT PLANET SYSTEM

To cancel:	<p style="text-align: center;">Click <b>Back</b></p> 	Press <b>F1</b>
<p>You must have closed Peugeot Planet 2000, Scantool<sup>1</sup> and Peugeot Planet Diag to quit Peugeot Planet Office. If you have not closed these applications, you receive a warning message.</p>		
Validate the message:	Click <b>OK</b>	Press <b>Enter</b>
Close the applications and retry the exit procedure of Peugeot Planet Office.		

<sup>1</sup> Available in the next updates.

# USING PEUGEOT PLANET SYSTEM

## 4 Configuring your Peugeot Planet System applications

Peugeot Planet Office and Peugeot Planet System applications can be configured by using the toolbar. The following procedure explains how your tools can be configured :

### 4.1 Selecting the language

Description	Mouse	Keypad
<p>To select the language::</p>	<p>Click the <b>Language</b> button</p> 	<p>Press <b>F11</b></p>
<p>A screen is displayed. You can select your language. This language will be used for any application started from Peugeot Planet Office.</p> <p><b>Warning:</b> if an application is already open and being used, the language will not be changed by using this procedure. To change the language, your selection must be done <b>before</b> starting the application.</p>		
<p>To select a language:</p>	<p>Double-click on the selected language</p>	<p>Use the arrows and validate by pressing <b>Enter</b></p>
<p>To cancel:</p>	<p>Click <b>Return</b></p>	<p>Press <b>F1</b></p>

# USING PEUGEOT PLANET SYSTEM

## 4.2 Updating Peugeot applications

It is recommended to proceed to regular updates of your Peugeot applications.

Each time you use Peugeot Planet Diag, it is updated (a screen informs you that version updates are available and suggests you to download them). Just read the information on the screen to perform the update.

To update the other applications (Peugeot Planet 2000, Peugeot Planet Measure, Scantool, Peugeot Planet Office), follow the procedure below.

Description	Mouse	Keypad
<p>Update is available:</p> <ul style="list-style-type: none"> <li>• either by using the icon on the left side of the screen</li> <li>• or by using the <b>Applications manager</b> menu by pressing <b>F5</b></li> </ul>	<p>Click on the update icon:</p>  <p>Click on the <b>Applications manager</b> button.</p> 	<p>Press <b>F5</b>.</p>
<p>The <b>Applications manager</b> menu is displayed.</p>		
<p>Peugeot Planet Office suggests you to perform an update.</p>		
<p>To look for a new update:</p>	<p>Click on <b>OK</b></p>	<p>Press <b>Enter</b></p>

# USING PEUGEOT PLANET SYSTEM

To cancel:	Click the <b>Return</b> button	Press <b>F1</b>
<p>If you have chosen to look for an update, the following screen is displayed:</p> <p>Just follow the instructions.</p>		

## 4.3 Activating / deactivating Peugeot applications

Peugeot Planet 2000, Scantool<sup>1</sup> and Peugeot Planet Office must be activated before they are used. Activating your applications for the first time will enable the system to check your identity and will give you the rights to use your applications.

However, you may be requested by the technical helpdesk to deactivate the applications in specific cases.

To carry one of these operations, just read the following the procedure:

Description	Mouse	Keypad
<p>To activate or deactivate the applications, go to the menu "<b>Applications managemer</b>":</p>	<p>Click on the <b>Applications managemer</b> button.</p> 	<p>Press <b>F5</b></p>

<sup>1</sup> To be offered for disposal in case of perspective evolutions.

## USING PEUGEOT PLANET SYSTEM

<p>The Applications manager menu is displayed.</p>		
<p>Select "<b>Activate / Deactivate</b>":</p>	<p>Double-click on the "<b>Activate / Deactivate</b>" link</p>	<p>Use the arrows, and validate by pressing <b>Enter</b></p>
<p>Select an item among the list (<b>Activate</b> or <b>Deactivate</b>)</p>	<p>Double-click on the selected link</p>	<p>Use the arrows, and validate by pressing <b>Enter</b></p>
<p>Follow the instructions</p>		

### 4.4 Getting to know the content of the latest CD update

To display the content of the latest major update performed on the Peugeot Planet 2000 applications, Peugeot Planet Measure, Scantool<sup>1</sup> and Peugeot Planet Office, just read the following steps:

Description	Mouse	Keypad
To get to a specific information:	Click on the <b>Applications manager</b> button	Press <b>F5</b>

# USING PEUGEOT PLANET SYSTEM

		
The " <b>Application manager</b> " menu is displayed.		
In the " <b>Application manager</b> " menu, select " <b>Information about the CD content</b> ":	Double-click on the <b>Information about the CD content</b> link	Use the arrows and validate by pressing <b>Enter</b>
To cancel:	Click on <b>Return</b>	Press <b>F1</b>
Information is displayed.		

## 4.5 Testing your Internet connection

Some applications or functionalities (Peugeot Planet Diag, Infotec, automatic configuration in PP2000, activation and deactivation...) require an Internet connection.

**NB: If you have any problem by using these applications and functionalities, please check the Internet connection before contacting the technical helpdesk.**

Please follow the procedure below.

Description	Mouse	Keypad
To test the Internet connection go to the " <b>Applications managemer</b> " menu :	Click on the <b>Applications manager</b> button.  	Press <b>F5</b>

# USING PEUGEOT PLANET SYSTEM

<p>The "<b>Application manager</b>" menu is displayed.</p>		
<p>Select "<b>Internet connection test</b>":</p>	<p>Double-click on the "<b>Internet connection test</b>" link</p>	<p>Use the arrows and validate by pressing <b>Enter</b></p>
<p>A message asks you to wait during the connection test.</p>		
<p>The result of the connection test is displayed. If the test is not successful, it may be necessary to configure the Internet connection.</p>		
<p>Validate the message :</p>	<p>Click <b>OK</b></p>	<p>Press <b>Enter</b></p>

## 4.6 Testing the availability of Peugeot Planet Diag

Peugeot Planet Diag runs by means of a remote server; to which you get connected via Internet. The application cannot run without this server. However, this server may not be available momentarily. An Internet link informs you about its availability.

# USING PEUGEOT PLANET SYSTEM

**NB: If you cannot use Peugeot Planet Diag, please check its availability before contacting the technical helpdesk.**

To do so, follow the procedure below.

Description	Mouse	Keypad
<p>To check if Peugeot Planet Diag is available, go to "<b>Internet links</b>" menu:</p>	<p>Click on the <b>Internet links</b> button.</p> 	<p>Press <b>F2</b></p>
<p>The "<b>Internet Links</b>" menu is displayed.</p>		
<p>Select "<b>Peugeot Planet Diag availability</b>":</p>	<p>Double-click on the "<b>Peugeot Planet Diag availability</b>" link</p>	<p>Use the arrows, and validate by pressing <b>Enter</b></p>
<p>Input your PSA login and password.</p> <p>The Peugeot Planet Diag welcome page is displayed.</p>		
<p>Click on the "<b>Application availability</b>" link</p>		

# USING PEUGEOT PLANET SYSTEM

<p>The availability of the Peugeot diagnosis server is displayed.</p>	
<p>If the <b>Diagnosis</b> indicator light is green, Peugeot Planet Diagnosis can be run. If it is red, the application cannot be run. Then wait until the application is available again.</p>	

## 4.7 Configuring the work station

Your PC can be configured by using some functionalities of the "Application manager" menu (**F5**).

**Don't change anything without the help of an installer or from the technical helpdesk.**

These functionalities are:

- **Configuration of the Peugeot Planet System customer type:** enables to configure your Internet links and your applications whether you work in DCS environment or not.
- **Configuration of the proxies:** enables to fit the PC to your local network configuration, so you can connect to Internet correctly.

## 4.8 Configuring your PC to accept a remote assistance

If calling to the technical helpdesk as a Peugeot Planet System customer not working through DCS, you may be requested to launch 2 softwares that will enable a remote operator to take control of your PC.

To access these softwares please follow the procedure below:

Description	Mouse	Keypad
<p>Start the remote control software window</p>	<p>Click on the <b>Remote control</b> button</p> 	<p>Press <b>F10</b></p>

## USING PEUGEOT PLANET SYSTEM

<p>The remote control assistance menu is displayed.</p>	 <p>The screenshot shows a window titled 'Peugeot Assistance' with a blue header. Below the header, there is a list of options: 'VNC Server' and 'IP2'. A text box at the bottom of the window contains the instructions: 'Sélectionner une application et valider' and 'Utiliser la touche "F1" pour annuler'. There are 'OK' and 'Cancel' buttons at the bottom right of the window.</p>	
<p>Select one of the softwares</p>	<p>Double-click on the selected software.</p>	<p>Use the arrows and validate by pressing <b>Enter</b></p>

# USING PEUGEOT PLANET SYSTEM

## 5 Working on a vehicle from the Peugeot range

This part describes the procedure to follow to work on a Peugeot vehicle and to use the different Peugeot Planet System tools. Access to these tools is provided by Peugeot Planet Office when starting the PC.

Peugeot Planet Office offers a simplified access to the Peugeot Planet System applications, by saving automatically the VIN code from multiplexed vehicles and by storing each input data. This feature will avoid you to input the same information several times (VIN code, built code, frame number). This feature is available in the following Peugeot Planet System applications:

- Peugeot Planet Diag
- Peugeot Planet 2000
- Electric wiring diagrams

Peugeot Planet Office also gives you access to Peugeot Planet Measure tools and Scantool<sup>1</sup> by a simple click.

### 5.1 Selecting a vehicle from the Peugeot range

Description	Mouse	Keypad
<p>After the PC has just been started, you can see the Peugeot Planet Office welcome page.</p>		
<p>To start a session on a Peugeot vehicle, select a vehicle from the list:</p>	<p>Double-click on the selected vehicle.</p>	<p>Use the arrows and validate by pressing <b>Enter</b></p>

<sup>1</sup> Available in the next updates.

# USING PEUGEOT PLANET SYSTEM

<p>For some vehicles, it is necessary to specify your choice in a second page (ex: the Peugeot 106).</p>		
<p>Specify the vehicle selected:</p>	<p>Double-click on the selected vehicle.</p>	<p>Use the arrows and validate by pressing <b>Enter</b></p>

## 5.2 Communicating with the vehicle

Description	Mouse	Keypad
<p>For some multiplexed vehicles, Peugeot Planet Office offers the possibility to collect the VIN code automatically.</p>		
<p>Make sure that your Peugeot Planet interface is properly connected to the PC and to the vehicle.</p> <p>Switch the ignition on.</p> <p>Validate this screen.</p>		

# USING PEUGEOT PLANET SYSTEM

<p>Peugeot Planet Office starts communicating with the vehicle. A standby screen indicates that the communication is in progress.</p>		
<p>In the case of an automatic VIN code reception, Peugeot Planet Office also displays a few information on the vehicle.</p>		
<p>If the VIN code is correct:</p>	<p>Click <b>OK</b></p>	<p>Validate by pressing <b>Enter</b></p>
<p>Otherwise:</p>	<p>Click <b>No</b></p> 	<p>Press <b>F4</b></p>
<p>Once the VIN code is validated, you get to the application selection page.</p> <p>You can also change the code manually.</p>		
<p>To validate the new VIN code:</p>	<p>Click <b>OK</b></p>	<p>Validate by pressing <b>Enter</b></p>

# USING PEUGEOT PLANET SYSTEM

To cancel :	Click <b>Return</b>	Press <b>F1</b>
-------------	---------------------	-----------------

## 5.3 Choosing an application

Description	Mouse	Keypad
<p>After the car has been selected, an application selection page is displayed.</p> <p><b>Note :</b> Depending on the vehicle type, you may not get access to the same number of applications.</p> <p>You will have a maximum of three applications availables:</p> <ul style="list-style-type: none"> <li>• Peugeot Planet Diag</li> <li>• Peugeot Planet 2000</li> <li>• Wiring diagrams</li> </ul>		
<p>Select an application:</p>	<p>Double-click on the selected application</p>	<p>Use the arrows and validate by pressing <b>Enter</b></p>

# USING PEUGEOT PLANET SYSTEM

## 5.4 How to input the vehicle data / start the application?

Description	Mouse	Keypad
<p>Fill in the vehicle information required by Peugeot Planet Office. These information can be:</p> <ul style="list-style-type: none"> <li>• the VIN code if it was not automatically read</li> <li>• the built code</li> <li>• the frame number</li> </ul> <p>For one vehicle, each information needs to be input only once.</p> <p><b>Observations :</b></p> <ul style="list-style-type: none"> <li>• In the case of an automatic VIN code detection, input is not requested.</li> <li>• All the data will be not necessarily displayed.</li> </ul>		
<p>Validate your data entry to start the application:</p>	<p>Click <b>OK</b></p>	<p>Validate by pressing <b>Enter</b></p>

# USING PEUGEOT PLANET SYSTEM

## 5.5 Checking the vehicle information

Description	With mouse	With keypad
<p>Peugeot Planet Office enables you to visualize the following information of the vehicle:</p> <ul style="list-style-type: none"> <li>• commercial type</li> <li>• VIN code</li> <li>• built number</li> <li>• frame number</li> </ul>		
<p>To visualize further information on the vehicle: click on the "<b>All the vehicle information</b>" link at the bottom of the data strip.</p>	<p>Click on the "<b>All information about vehicle</b>" link</p> 	<p>Press <b>F9</b>:</p>
